OKLAHOMA STATE TREASURER

MONTHLY INVESTMENT
PERFORMANCE REPORT

SEPTEMBER 2009

SCOTT MEACHAM
OKLAHOMA STATE TREASURER

October 23, 2009

To the People of Oklahoma:

I am pleased to issue the September monthly investment performance report for the Office of the State Treasurer. I trust you will find it thorough and in keeping with my commitment to provide full and complete disclosure of all activities within my office. As always, my staff and I are available to answer any questions you might have.

Market Conditions

Yields on most U.S. Treasuries were down for the month of September and the yield curve continued to flatten as longer term rates fell more than short term rates. The two and three year Treasury Notes posted moderately higher yields of two and three basis points at month end. The benchmark 30-year Treasury Note posted the largest decrease in yield, down 14 basis points to finish at 4.05%. The Dow Jones Industrial Average (DJIA) jumped 15% in the latest three months for its biggest quarterly gain since the fourth quarter of 1998 and its best quarter since 1939. The DJIA is up 48% from its March 9 low and up 11% this year, although still down 31% from its October 2007 record. The 28% gain over the past six months was the best performance since the two quarters ended in March 1987. The Standard and Poor's 500 index gained 15% in the third quarter leaving it up 17% for the year and up 56% from the March low but off 32% from its October 2007 high. As expected, the Federal Open Market Committee (FOMC) kept the interest rate target range unchanged at 0 to 0.25% at its two-day meeting in September. The Federal Reserve has begun to map out its exit strategy. The Federal Reserve said it will be winding down its program for buying U.S. Treasury securities at the end of October and plans to end buying of mortgage and agency debt at the end of the first quarter of 2010.

Economic Developments

The Institute for Supply Management reported that its index of manufacturing activity rose to 52.9 in August from 48.9 in July. This is the first expansion in manufacturing since January 2008. The unemployment rate in August jumped to 9.7%, the highest since 1983. The average work week held at 33.1 hours. Average weekly earnings were up to \$617.32 from \$615.33. Data on retail sales at department stores for August showed a decline of 2% for the month after falling 5% in July as deep discounts and sales promotions failed to lure shoppers back to the stores. The producer price index (PPI) for finished goods jumped 1.7% in August after falling 0.9% in July. Most of the rise was the result of higher gasoline prices which increased 23%. The Commerce Department reported retail sales rose 2.7% in August after having fallen 0.2% the prior month. This was the strongest showing since January 2006. The overall consumer price index (CPI) rose 0.4% in August, largely because gasoline prices climbed 9.1%. The trade balance widened to \$32 billion in July. Imports soared 4.7% primarily due to demand for autos, computers and oil. The Conference Board's consumer confidence index fell to 53.1 in September from 55.4 in August.

Portfolio Commentary: Performance, Diversification, and Strategy

Yield on the Treasurer's portfolio was 3.13% in September and the weighted average maturity was 485 days. There were decreases in U.S. Treasuries and U.S. government sponsored enterprises as funds from maturities in those classes were temporarily invested in the overnight repurchase agreements and money market mutual funds. The year-to-date monthly average investable base was up \$28 million to \$3.541 billion. Portfolio diversification continues to be sound. U.S. Treasuries represented 6% of holdings, and U.S. government sponsored enterprises accounted for approximately 37%. Mortgage-backed securities were 23%, Municipal Bonds were 2% and Certificates of Deposit represented 6% of assets. Money market mutual funds were 10% and 12% was maintained in overnight repurchase agreements. Link deposits (at less than 1%), State Bond Issues (at 3%) and foreign bonds (at less than 1%) made up the balance of funds invested. In keeping with the State's statutory investment objectives, the portfolio strategy continues to seek safety, liquidity, and return on investment, in that order. Based on market conditions, portfolio strategy will consist of a combination of laddered maturities and market observation for investment opportunities.

Collateralization

All funds under the control of this office requiring collateralization were so secured at rates ranging from 102% to 110%, depending on the type of investment.

Payments, Fees, and Commissions

All securities were purchased or sold on a net basis utilizing competitive bidding where practicable, with no additional fees or commissions known to the State Treasurer. Bank fees, mutual fund operating expenses and fees charged by JPMorgan Chase for the Tri-Party Repurchase Agreement Program are detailed in the attached pages, as is the earnings split between the Treasurer and the master custodian bank on securities lending income.

Total Funds Invested

Funds available for investment, at cost basis, include the State Treasurer's investments at \$3,601,743,138 and State Agency balances in OK Invest at \$1,859,977,196 for a total of \$5,461,720,334.

Sincerely,

SCOTT MEACHAM, STATE TREASURER

Explanation of Performance Comparison September 30, 2009

The following page presents market rates of return on the Securities portion of the General Account and of the State's aggregated State Agency Accounts. The figures, which are dollar- and time-weighted, where appropriate, are calculated using the percentage change in market value (inclusive of accrued income) from the end of the prior month to the end of the reporting month. To ensure the integrity of the data, this information is provided by the Treasurer's custodian bank acting in its capacity as an external third party. As such, performance measurement is presently confined to those investments which are custodied at Northern Trust ("Northern").

The Treasurer's office is trying to develop a method to report rates of return on all investment instruments in the State's portfolio. This is in an effort to report return data in a manner recommended on September 15, 1994, by the Working Group of the Cash Management and Investment Oversight Commission. However, there are technical and conceptual challenges to expanding performance measurement to other portions of the portfolio. Attempting to apply market-base pricing calculations to instruments which do not trade, such as Certificates of Deposit, presents difficulty which is both conceptual and technical in nature.

Benchmark data is also provided on the following page.
